The screenshot shows a directory of no-code tools. At the top, there are navigation tabs for 'Website Builders', 'E-Commerce', 'Scrapers', 'Forms', 'App Builders', and 'Automation'. The main content area is a grid of tool cards, each with a logo, name, brief description, and a 'SPONSORED' badge. The tools listed include: Browse AI (AI scraper), Wix Studio (web creation platform), Flowlet (low-code API platform), Bright Data (web data platform), Bildr (open-ended website and app builder), Jotform Apps (no-code app builder), and Jotform (form automation). On the right side, there is a 'Sort' dropdown menu set to 'Sorted By Sponsored' and a 'Trending Tools' section with smaller tool cards for Wix Studio, monday.com, DVVO Headshots, Jotform, Thinkable, and Jotform Apps.

Data solutions for no-code problems

Tools like Bright Data's 'Data Collector' are leading the way with solutions.

 Art West
August 17, 2022

bright data

The biggest 'No Code' issues today, fixed by Bright Data

#1: Dealing with unstructured data 🚫

Unstructured data files include:

1. Duplicate/incomplete data points
2. Corrupted files
3. Incorrectly formatted or mislabeled datasets.

They come in a variety of formats and require a lot of time and manpower to structure, and prepare for analysis.

#2: Finding ways to collect qualitative data 🤖

Qualitative data gives you context, and a clear narrative of what is going on in your industry, such as: *How do consumers feel about a brand or product on social media?* (i.e. social sentiment data). But navigating social media site architectures can be complex.

Automating E[xtract] T[ransform] L[oad] pipelines 🚀

Creating ETL data extraction pipelines are a crucial part of decreasing a company's 'time to insight'. A good ETL data ingestion flow will enable companies to collect raw data in various formats, from multiple sources, and input it into their systems efficiently for analysis. This is a lengthy, manual process which can set a project back days, weeks, or even months.

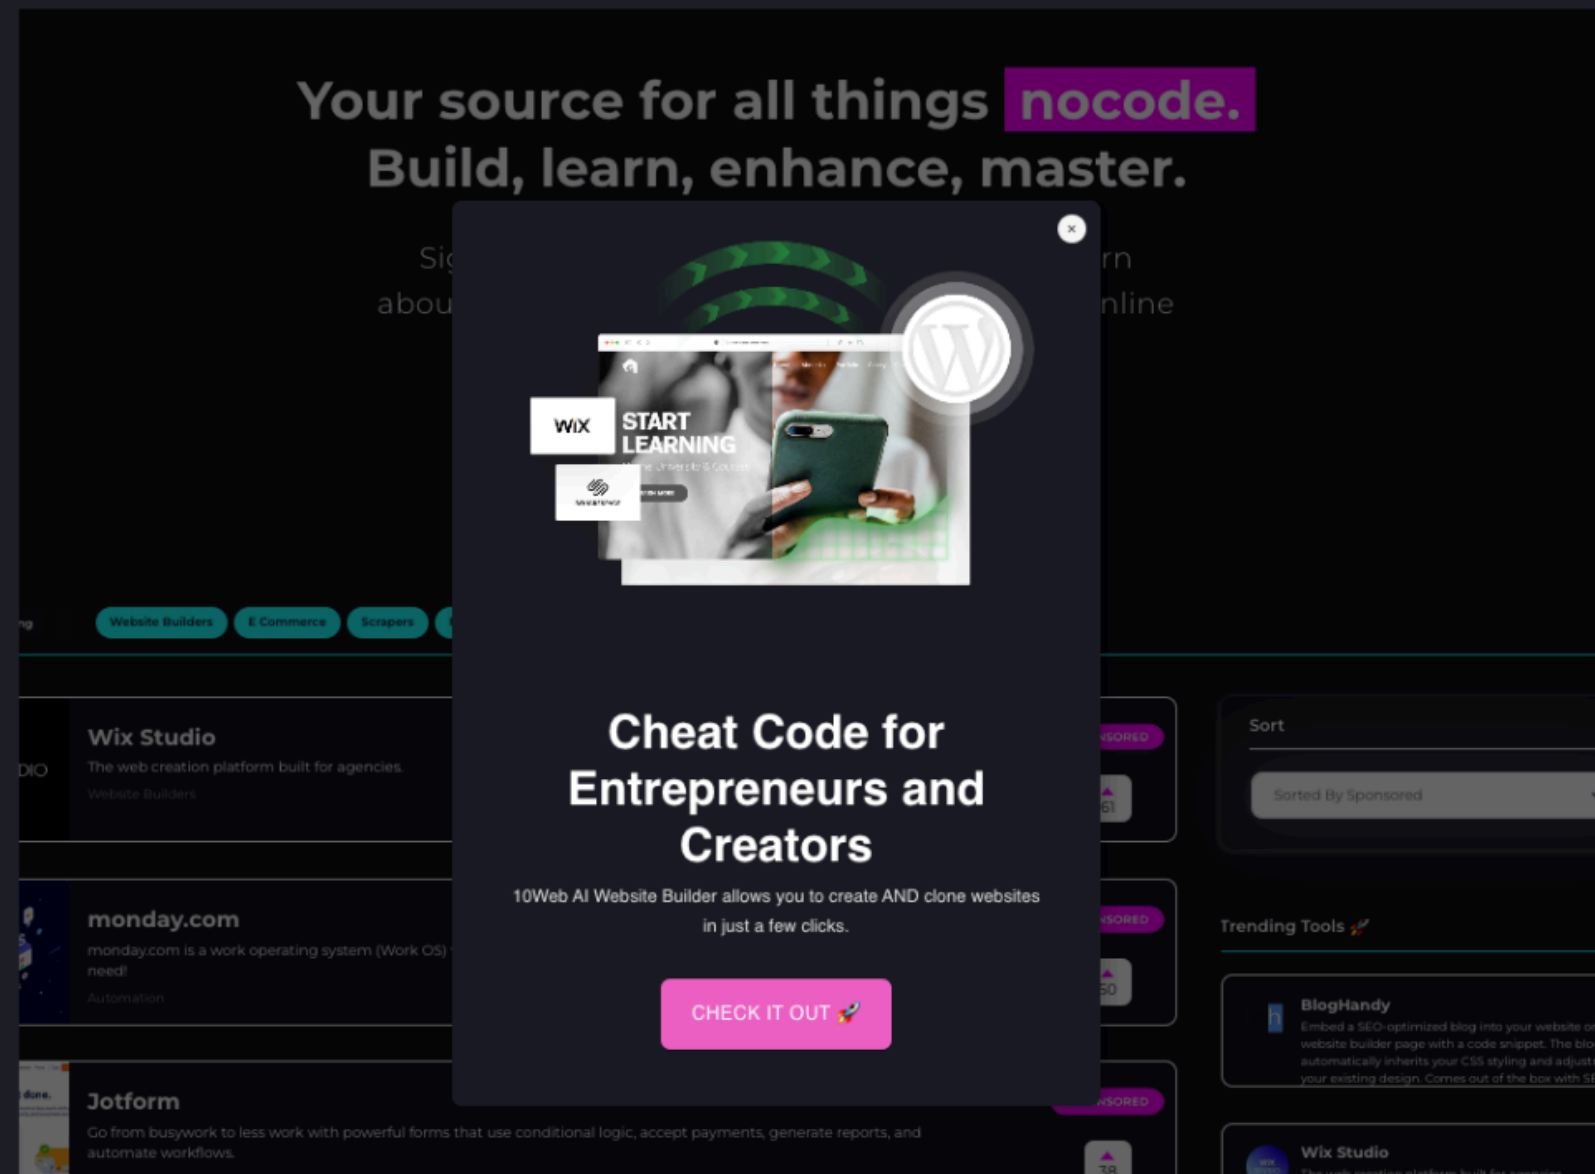

Data-on-Demand

Data-on-Demand addresses these issues within the framework of the 'no-code' community.

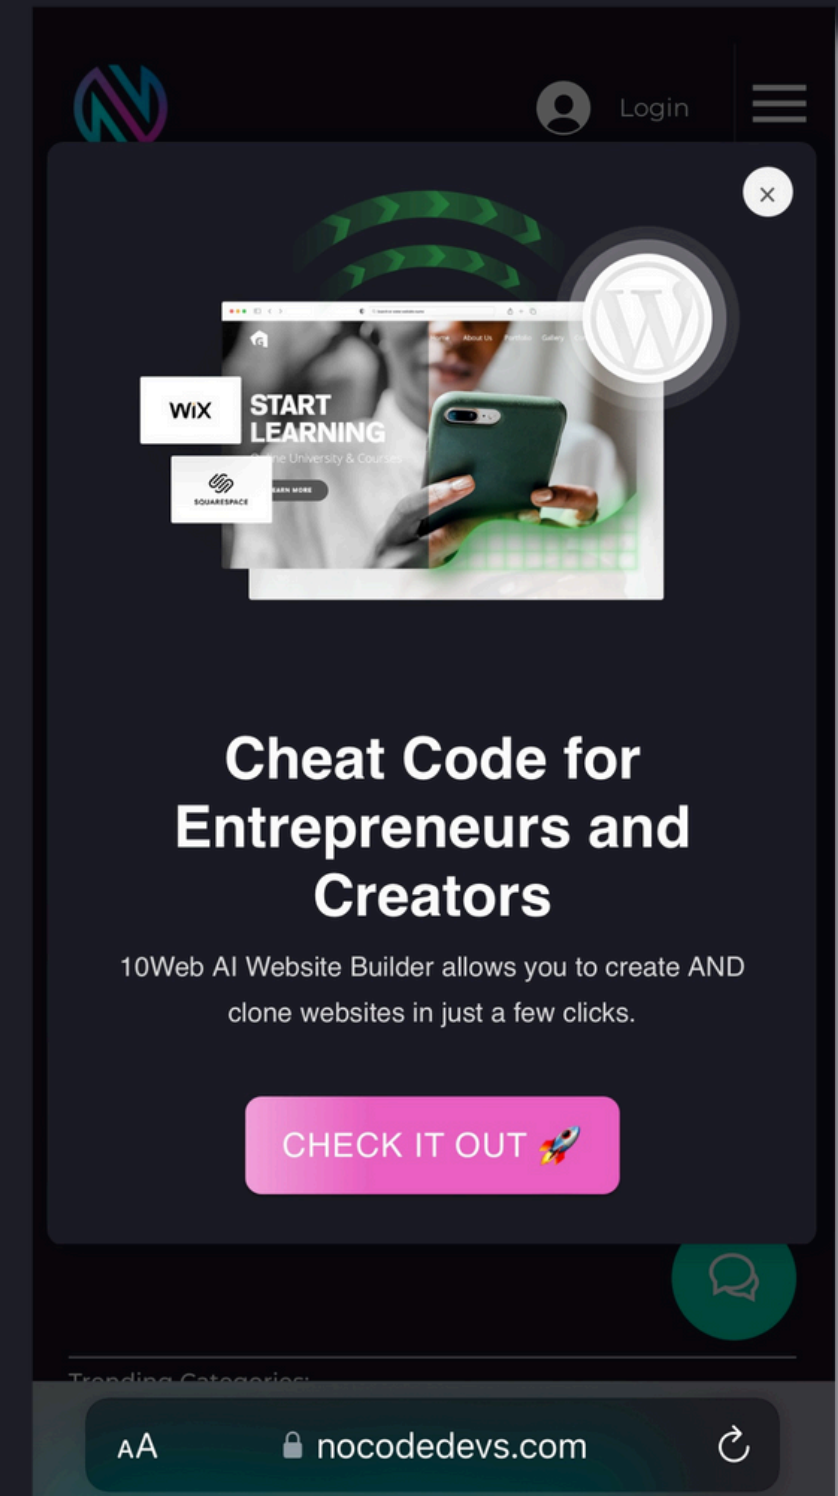

Tools like [Bright Data's 'Data Collector'](#) are leading the way with a solution that offers:

Pop-up Ad

The screenshot shows a website with a dark theme. The main heading reads "Your source for all things nocode. Build, learn, enhance, master." Below this, there are several product cards for "Wix Studio", "monday.com", and "Jotform". A dark grey pop-up ad is centered on the screen, featuring a header image with a person holding a smartphone and the text "START LEARNING". The main text of the ad says "Cheat Code for Entrepreneurs and Creators" and "10Web AI Website Builder allows you to create AND clone websites in just a few clicks." A pink button labeled "CHECK IT OUT" is at the bottom of the ad.

The screenshot shows a website with a dark theme. The main heading reads "Cheat Code for Entrepreneurs and Creators". Below this, there is a paragraph: "10Web AI Website Builder allows you to create AND clone websites in just a few clicks." A pink button labeled "CHECK IT OUT" is at the bottom of the ad. The ad also features a header image with a person holding a smartphone and the text "START LEARNING". The website's navigation bar includes a logo, a "Login" button, and a menu icon. The browser's address bar at the bottom shows "nocode devs.com".
